

Notes for developer

HOME PAGE

Hero image - Image used in the PSD could not be located from previous designer. For now, please use bikes-green.jpg.

PAGES:

There are a total of 8 pages on the site: "Home," "Register your interest," "contact us," "press," "policies," "become a registrar," "FAQ," and the "domain grant" page. The "domain grant" page isn't linked to from anywhere else on the site.

Each page of the site is shown on its own artboard in the psd file. The only exception is the "become a registrar" page, which has 5 artboards that show the various dropdown states of the .eco launch timeline.

CONTACT FORM ON CONTACT PAGE:

Please make the form field that says subject as a functional drop down with "Please select..." and list

- General
- Sales

GRID STRUCTURE:

The three-column grid overlay is visible on each page when you open the psd file. If you click the eye on the top layer named "3 col grid" you can click to toggle it on and off.

The 12-column bootstrap grid is also visible if you have your guides turned on. If you don't see it on each page, hit "command" + ";" (or go to View -> show -> and click "Guides").

HOVER STATES:

The only hover states on the site are the "register your interest" buttons in the main nav and the footer. Those turn white when hovered over.

STICKY NAV:

The primary nav bar should be sticky and remain at the top of the screen when the user scrolls down the page.

FONTS:

The website contains two fonts. Effra bold for headers and quotes, and Lato regular for body copy. Although the design was mocked up using Effra bold for headers and Effra light for quotes and subheaders, we will be substituting in Open Sans Bold and Light for headers and subheaders/quotes, respectively. Both Open Sans and Lato are available on Google fonts.
